## BTC tumbles toward \$3900. Sees yearly lows of \$3500.

Bitcoin continued its decline after a swift break towards the downside at the \$6000 & \$5000 levels, breaching into the \$3000 zone & ultimately hitting a low of \$3475 on Bitstamp. Volatility and uncertainty is currently ruling the market.

### Bcash Saga: Another market lacking certainty.

After the Bitcoin Cash fork debacle there has been significant volatility on the new pairs created, trading namely as Bitcoin Cash ABC (BAB) and "Satoshis Vision" (BSV).

### Binance invests \$3M into Crypto Trading Desk.

Binance Labs revealed an investment made in Koi Trading, an OTC trading operation in San Francisco. Koi offers assistance with data science, quantitative research and compliance. [Link](#)
